

Chatter Resistant Boring Bars

Dimple Bar Series

Series
Expansion

**Highly rigid and lightweight
head prevents vibration for
better surface finishes**

Features of Dimple Bar

Highly rigid steel shank and a lightweight head configuration, designed by computer simulation analysis reduces chatter and improves the vibration damping properties.

Chip disposal is improved by having two channels for chip evacuation.

The lightweight head with its large dimple reduces chatter.

Available in sizes smaller than the ISO standard. Therefore the boring of small diameter holes is possible.

The boring bar has a laser printed scale on the shank to facilitate easy installation.

"F and FS" breakers improves the quality of the surface finish, "MV" breaker offers excellent chip disposal. High wear resistant CBN inserts are also available for the machining of hardened materials.

Vibration Resistance

● DIMPLE BAR

Weight of the Head	Damping Time
49.7g	15.8ms

By reducing the weight of the head, the damping properties are increased.

● Conventional Product

Weight of the Head	Damping Time
70.1g	20ms

* The simulation data stated above was conducted with a FSCLP1816R-09S holder, under the following conditions; $l/d=5$, depth of cut=0.5mm, and feed=0.05mm/rev.

Direction for the use of CCG/MT • CPG/MT • CPMX • TPG/MX type inserts

By changing the clamp screw, it is possible to use the inserts listed in the table below.

Holder : FSCLC/P • FSCLC/P...E

Insert Number	Clamp Screw
CCG/MT0602 (φ6.35)	Can be used as it is.
CPG/MT0802 (φ7.94)	Change to TS3
CPG/MT0903 (φ9.525)	Change to TS4
CPMX0802 (φ7.94)	Can be used as it is.
CPMX0903 (φ9.525)	Can be used as it is.

Holder : FSTUP • FSTUP...E

Insert Number	Clamp Screw
TPG/MX0802 (φ4.76)	Change to CS200T
TPG/MX0902 (φ5.56)	Change to CS250T
TPG/MX1103 (φ9.525)	Change to CS300890T

* If the screw is too long the please shorten as necessary.

Note 1) TPMT/W09, W11 types cannot be used due to a different clamp screw size.

Note 1) When vibrations occur, reduce cutting speed by 30%.

Note 2) The depth of cut needs to be less than the corner diameter when using the FSVJ type.

Note 3) The recommended pressure for the internal coolant is 1MPa.

Cutting Performance

	Measured Value	Ra
NEW Steel shank with coolant hole		1.4μm
Steel shank without coolant hole		2.4μm

<Cutting Conditions>
 Work Material : JIS SCM400
 Tool : KAPR 93°
 Inserts : DCMT070204-MV
 Cutting Speed: $v_c = 80 \text{ m/min}$
 Feed per Rev. : $f = 0.1 \text{ mm/rev}$
 Depth of Cut : $a_p = 0.5 \text{ mm}$
 Cutting Mode : Wet Cutting Internal vs External
 (Water-soluble Cutting Fluid)

Insert Grade

Cermet

The optimised alloy structure and special alloy binder improves both wear and fracture resistance.

For Wet Cutting

NX3035

For Dry Cutting

NX2525

For Improved Surface Finishes

MP3025

CBN

CBN-series for Hardened Steel Turning

BC8220 **NEW**

BC/MB8100

Coated CBN Grade for Cast Irons

BC5110 **NEW**

Grade

ISO Insert Series for Steel Turning

MC6000 Series

MC6015 For High Speed Cutting

MC6025 The Standard Choice

PVD Coated Cemented Carbide Grade for Carbon Steels

MS6015

Ideal for carbon and free cutting steels. For superior surface finishes and excellent dimensional accuracy.

ISO Insert Series for Cast Iron Turning

MC5000 Series

Reduced cycle times!

New coating for speeds up to 600 m/min.

ISO Insert Series for Stainless Steel Turning

MC/MP7000 Series

Excellent resistance to notch wear and provides good burr control.
Long tool life achieved due to high plastic deformation resistance.

ISO Turning Inserts for Difficult-to-cut Materials

MP/MT9000 Series

The high Al-rich (Al,Ti)N single layer coating significantly reduces edge fracturing.

PVD Coated Grade for High Precision and Small Parts Machining

MS9025 NEW

Improved Cutting Edge Delivers Next Generation Small Parts Machining

Memo

Chatter Resistant Boring Bars

Dimple Bar Series

For Your Safety

●Don't handle inserts and chips without gloves. ●Please machine within the recommended application range and exchange expired tools with new ones in advance of breakage. ●Please use safety covers and wear safety glasses. ●When using compounded cutting oils, please take fire precautions. ●When attaching inserts or spare parts, please use only the correct wrench or driver. ●When using rotating tools, please make a trial run to check run-out, vibration and abnormal sounds etc.
